The Standard Has Been Raised

There are good days, and then there are days worth pouring something special for. At the 2026 Asia World Spirits Competition, two of our spirits received recognition — with East Indies London Dry Gin taking home Double Gold and Nusantara Cold Brew earning Silver.

For East Indies London Dry Gin, the moment is particularly special. This marks the first-ever award for our London Dry Gin, making the Double Gold recognition a milestone we're especially proud of.

Built around a distinctive botanical profile and inspired by Indonesia's rich spice heritage, East Indies London Dry Gin brings its own perspective to the London Dry style. Seeing it recognised on an international stage makes all the work behind the bottle feel that much more rewarding.

Then there's Nusantara Cold Brew, bringing the richness of Indonesian coffee into the world of spirits. Made using coffee beans sourced from regions across Indonesia, it's a celebration of the diversity and character found in the country's coffee-growing landscape.

Its Silver recognition adds another chapter to the story and another reason to celebrate the craft and ingredients that make Nusantara Cold Brew what it is.

Awards aren't why we make spirits. But they're a pretty great reminder of why we keep pushing ourselves to make them better. So here's to the craft, the curiosity, and everyone behind every bottle. The standard has been raised. And we're just getting started.
